ALIGNMENTS

RESULTS
REDUCED VEHICLE
OPERATING COSTS

Truck Service Offers:

- State of the art computerized Hunter Alignment Systems
- ASE certified technicians
- 10 point vehicle inspection before the alignment
- Before and after printed report of the alignment readings
- Toe, camber, caster, & rear thrust angle adjustments as needed
- Competitive pricing
- Complete warranty of parts and labor

Benefits of Proper Alignment

- Increase tire life
- Improve handling and safety
- Improve fuel economy
- Reduce driver fatigue
- Prevent premature suspension component wear

10 Step Check and Inspection Process

- 1.) Ask and document any problems you are experiencing with the vehicle
- 2.) Protect your vehicle with seat and floor coverings
- 3.) Perform CDL pre-trip inspection
- 4.) Conduct a road test to identify any additional issues
- 5.) Check tire air pressure, wear patterns, tread depth, condition, ride height, wheels, and lug nuts
- 6.) Inspect all front steering components
- 7.) Inspect for loose or missing bolts or nuts, cracks or other damaged or worn conditions
- 8.) Inspect front and rear suspension components
- 9.) Take readings of all angles and wheel geometry
- 10.) Discuss readings and vehicle condition with you, including additional adjustments and if any repairs are recommended
